

# Matillion ETL

## Packages Overview

**Transform data faster with a plan built for your scale and complexity.**

Whether you're building your first data pipelines or orchestrating transformations across global teams, Matillion provides the power and flexibility to fit your data journey.

Each package includes the same powerful core platform, with added features to meet advanced collaboration, automation, and scalability needs.

|  | Developer | Basic   | Advanced | Enterprise |
|--|-----------|---------|----------|------------|
| <b>Matillion ETL</b>                           |           |         |          |            |
| Users* ⓘ                                       | ✗         | 5 users | 5 users  | 5 users    |
| Self-hosted deployment ⓘ                       | ✗         | ✓       | ✓        | ✓          |
| 70+ pre-built connectors ⓘ                     | ✗         | ✓       | ✓        | ✓          |
| Matillion scripting components ⓘ               | ✗         | ✓       | ✓        | ✓          |
| Real-time validation and sampling components ⓘ | ✗         | ✓       | ✓        | ✓          |
| Job automation and advanced scheduling ⓘ       | ✗         | ✓       | ✓        | ✓          |
| Unit-testing and error handling components ⓘ   | ✗         | ✓       | ✓        | ✓          |
| Audit-logs and auto-generated documentation ⓘ  | ✗         | ✗       | ✓        | ✓          |
| Manage visibility in groups and projects ⓘ     | ✗         | ✗       | ✓        | ✓          |
| Concurrent connections with your Warehouse ⓘ   | ✗         | ✗       | ✓        | ✓          |
| Git repository ⓘ                               | ✗         | ✗       | ✗        | ✓          |
| External Matillion Database ⓘ                  | ✗         | ✗       | ✗        | ✓          |
| Clustered environments ⓘ                       | ✗         | ✗       | ✗        | ✓          |
