

Get **business-ready data in minutes**, for your Lakehouse Accelerate Delta Lake on Databricks adoption with Matillion.

In today's world, the only way to get ahead is to get better data to the business at speed, accelerate the use of that data company-wide, and truly realize the full-value of the cloud fast.

Get up and **running quickly**

Integrate all your data from all sources into Delta Lake on Databricks, with massive speed and agility, at scale.

Easy data loading

Intuitive user interface for batch loading and change data capture (CDC) with ability to leverage existing or create new connectors to virtually any source in minutes, legacy or SaaS, from CDPs to apps.

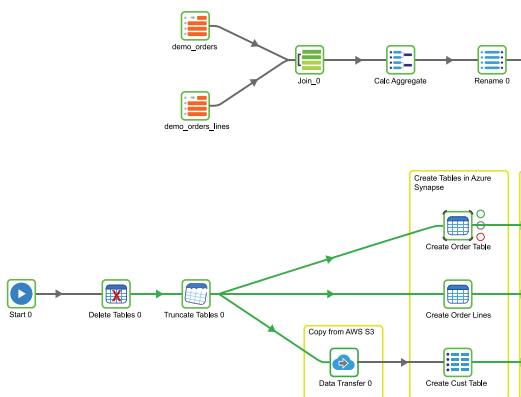

Realize value fast

Rapidly progress from proof-of-concept to production to ROI.

Utilize the full scale of the cloud

Optimized integration and processing on Databricks to free up time for more valuable work.

Deliver data ready for the business, **fast**

Get clean, complete data to the business efficiently, ensuring greater consumption and use of data for decisions and operations.

Transform data at speed

Leverage Matillion's low-code/no-code platform for building efficient, high-volume transformations in Delta Lake for Databricks.

Easy to Manage

Schedule, monitor and manage all pipelines in one place.

Save money and scale.

Train more cost-effective resources, letting data engineers perform higher-value work.

Realize the value of Delta Lake on Databricks faster, with Matillion.

Purpose built for the Lakehouse

Matillion's cloud-native data integration platform for Delta Lake on Databricks complements your data science and development activities helping you deliver business and analytics-ready data at speed and scale.

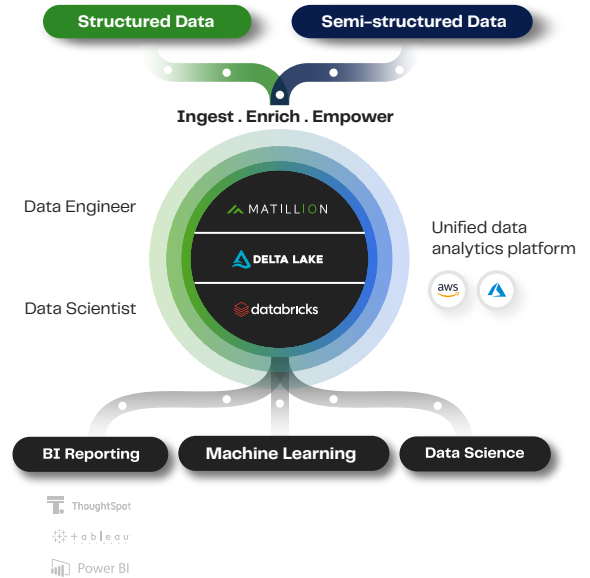

Databricks specific support
ACID Transactions, time travel, SparkSQL on Photon, schema enforcement, unlimited batch and CDC source and sink, and more.

High-end security capabilities
Provide advanced deployment options and rights management, leveraging governance.

Orchestrate data flows.
From ingestion to consumption, with consistent metadata regardless of underlying infrastructure.

Accelerate time-to-value with Matillion's platform

<p>Load</p> <p>Collect data from any source with universal data connectors.</p>	<p>Transform</p> <p>Cleanse and enrich data to create current, correct, complete datasets for every application.</p>	<p>Orchestrate</p> <p>Manage data across its entire lifecycle with consistent metadata regardless of the underlying infrastructure.</p>	<p>Sync</p> <p>Set up datasets for consumption across the business for BI, analytics, AI/ML and more.</p>
