Matillion Enterprise Connectors for SAP

Quickly realize the value of your SAP data with Matillion Data Productivity Cloud

Thousands of enterprises depend on SAP ERP software to manage their operations. As these enterprises increasingly start to invest in cloud data platforms – for advanced analytics, data science, and more – they need help getting their SAP data to the cloud and enriching it to maximize its value.

Challenges to operationalizing SAP data in the cloud

COMPLICATED CLOUD MIGRATION
Difficulty getting SAP data to a cloud data platform from disparate sources effectively and efficiently.

DELAYED SAP INSIGHTS
Inability to deliver business-ready SAP data to analytics teams in a timely manner.

UNSUSTAINABLE PRACTICES
Time-consuming and complex hand coding to deploy and manage SAP data pipelines.

Matillion Data Productivity Cloud

Matillion Data Productivity Cloud helps data teams gather data from all data sources into the cloud, enrich that data and get it into a format that is ready to be used by the business, and do it faster by leveraging the virtually unlimited scalability and compute power of the cloud.

Matillion's new enterprise connectors for SAP simplify the loading, transformation, synchronization, and orchestration of SAP data pipelines to maximize value across your business.

Matillion Enterprise Connectors for SAP

CONNECT IT
Unlock the power of your SAP data.

PUT IT TO WORK
Get SAP data business-ready in minutes.

GET VALUE FASTER
Automate your SAP data pipelines.

Connect your SAP data to your cloud data platform of choice with Matillion connectors for SAP S/4 HANA and SAP ECC 6.*

Put your SAP data to work with Matillion's low-code / no-code technology and intuitive drag-and-drop interface.

Get your SAP data business-ready faster and benefit from the advanced analytics capabilities of cloud data platforms like Snowflake, Databricks, and Amazon Redshift.*

SAP Operational Data Provisioning (ODP) and Operational Delta Queue (ODQ) frameworks are utilized to make data extraction and loading more efficient – for full and delta loads.

Empower more users to access, analyze and realize value from SAP data, making your business users more productive.

Take advantage of the unique capabilities of your cloud data platform of choice with Matillion's push-down ELT technology that delivers greater scalability and superior performance.

* Not all connectors available for all supported cloud platforms. Matillion will continue to expand support for SAP data sources and cloud data platforms.

Get your SAP data into your cloud data platform and ensure its availability for a wide variety of use cases:

CUSTOMER DATA
Expand understanding of customers by combining CRM and back-office operational systems (ERP, supply chain, etc.) to increase revenues/reduce costs.

MAINTENANCE
Avoid unscheduled and accidental equipment breakdowns through evaluation of upkeep and failure history.

FINANCIAL DATA
Improve decision making and overall performance through analysis of profits and costs across a greater number of organizational parameters.

SUPPLY CHAIN
Identify root causes of shipping delays and alleviate costs through monitoring and analysis of supply chain data – purchasing, operations, and distribution.
