

# Get **business-ready data in minutes**, for your Data Cloud Accelerate Snowflake adoption with Matillion.

In today's world, the only way to get ahead is to get better data to the business at speed, accelerate the use of that data company-wide, and truly realize the full-value of the cloud fast.

## Get up and **running quickly**

Integrate all your data from all sources into Snowflake Data Cloud, with massive speed and agility, at scale.

### Easy data loading

Intuitive user interface for batch loading and change data capture (CDC) with ability to leverage existing or create new connectors to virtually any source in minutes, legacy or SaaS, from CDPs to apps.

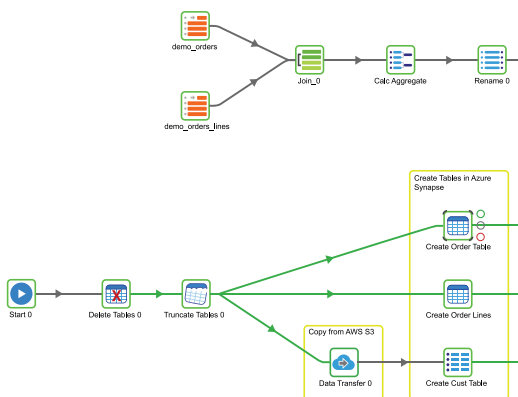

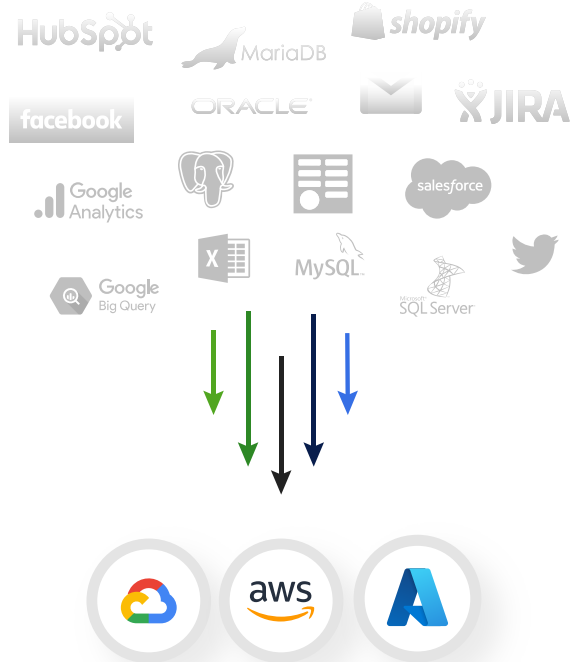

### Realize value fast

Rapidly progress from proof-of-concept to production to ROI.

### Utilize the full scale of the cloud

Optimized integration and processing on Snowflake to free up time for more valuable work.

## Deliver data ready for the business, **fast**

Get clean, complete data to the business efficiently, ensuring greater consumption and use of data for decisions and operations.

### Transform data at speed

Leverage Matillion's low-code/no-code platform for building efficient, high-volume transformations in Snowflake Data Cloud.

### Easy to Manage

Schedule, monitor and manage all pipelines in one place.

### Save money and scale.

Train more cost-effective resources, letting data engineers perform higher-value work.

## Realize the value of Snowflake Data Cloud faster, with Matillion.

### Purpose built for Snowflake

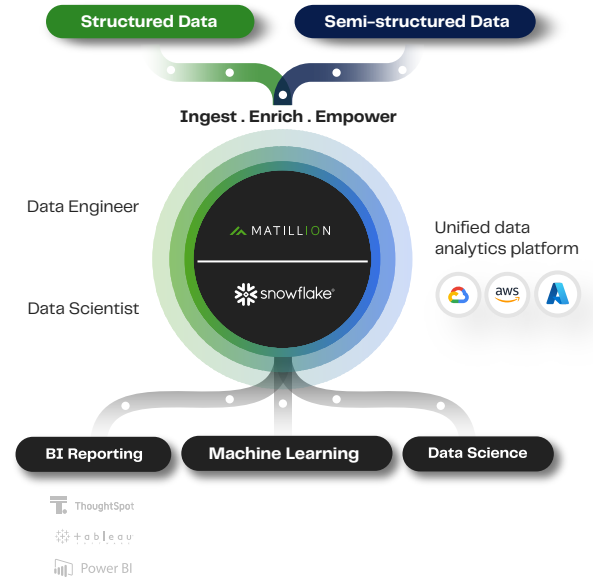

Matillion helps you build out a data and analytics platform that takes full advantage of the speed, performance, and scalability of Snowflake Data Cloud, enabling you to deliver business and analytics-ready data at speed and scale.

- 

**Snowflake specific support**  
Zero copy clone, alter warehouse, and more, directly from Matillion ETL, plus maximum Snowflake performance.
- 

**High-end security capabilities**  
Provide advanced deployment options and rights management, leveraging governance.
- 

**Orchestrate data flows.**  
From ingestion to consumption, with consistent metadata regardless of underlying infrastructure.

## Accelerate time-to-value with Matillion's platform

<p><b>Load</b></p> <p>Collect data from any source with universal data connectors.</p>	<p><b>Transform</b></p> <p>Cleanse and enrich data to create current, correct, complete datasets for every application.</p>	<p><b>Orchestrate</b></p> <p>Manage data across its entire lifecycle with consistent metadata regardless of the underlying infrastructure,</p>	<p><b>Sync</b></p> <p>Push datasets back out across the business for consumption in the core systems of record.</p>
